

General District Information

Goal 1

Improving Academic Outcomes: Literacy Goal

OMSD has been placed on coordinated support due to our reading scores on the previous Aspire test. We had 41% of our students who scored at risk on the test in reading. Our goal for the current school year was to reduce that number to 36%. We won't know if we met that goal until the fall of 2024. For the SY of 24-25 we have an additional goal of reducing the percentage of students scoring at risk to 31%. We are working to reduce our number of students struggling to read by at least 5 % each year.

Goal 2

Improving Academic Outcomes: Math Goal

OMSD had 35% of our students who scored at risk on the Aspire test in math last year. Our goal for the current year was to reduce that number to 30% at risk. We won't know if we achieved this goal until the fall of 2024. For the SY of 24-25 we have an additional goal of reducing the percentage of students scoring at risk to 25%. We are working to reduce the number of students struggling with mathematical computation by 5% each year.

Goal 3, optional

HQIM Overall Goal

By the end of the school year, 100% of K-12 teachers in the district will consistently use high-quality instructional materials in their classrooms to improve student achievement as evidenced by an increase in student performance on formative and summative assessments. Teachers will receive training and support in selecting, implementing, and effectively utilizing these materials in their instruction. The adoption and implementation of high-quality instructional materials will be monitored and supported through regular observations, data analysis, and professional development opportunities.

Goal 4, optional
